P 57 Population and Housing Census of the Kyrgyz Republic 2022: Volume II (Part 3) in tabular format: Migration of the Population of the Kyrgyz Republic. -B.: 2024., -152 pages.

ISBN 978-9967-9515-3-2

The Compendium contains data on the number of temporarily absent, long-term absent population, its age-gender structure and ethnic composition, level of educational attainment, internal migration, collected as a result of the 2022 Population and Housing Census in the Kyrgyz Republic.

This publication is intended for use by government and management bodies, socioeconomic services, agencies and organizations, scientific and expert communities dealing with demographic issues, as well as postgraduate students and students of higher vocational schools, mass media and private citizens.

When using official statistics data and corresponding metadata, users are obliged to refer to data sources (Article 30 of the law of the Kyrgyz Republic "On Official Statistics").

The following symbols and notations are used in the Compendium:

- Fact not available:
- ... Data not available;
- 0.0 Indicator value is below 1.

In some cases, minor discrepancies between the totals and the sum can be explained by using rounded data.

#### I. PREFACE

The Compendium "Population Migration of the Kyrgyz Republic" is the first publication containing statistical data on population migration in the Kyrgyz Republic.

This publication has been prepared in Kyrgyz, Russian and English languages with the support of the International Organization for Migration projects "Labour Migration Programme in Central Asia", funded by the Swiss Agency for Development and Cooperation (SDC) and the "Displacement Tracking Matrix – Regional Evidence for Migration Analysis and Policy" project, funded by the European Union.

This Compendium has been prepared by the National Statistical Committee of the Kyrgyz Republic as part of the implementation of the Migration Policy Concept of the Kyrgyz Republic for 2021-2030, specifically its component on providing official statistics to users for the purposes preparing analytical materials, documents and formulation of policies and strategies related to population migration.

According to paragraph 27.2 of the Action Plan for the Implementation of the First Stage (2022-2025) of the Migration Policy Concept of the Kyrgyz Republic for 2021-2030, the National Statistical Committee of the Kyrgyz Republic has sampled data on labour migration based on the results of the National Population and Housing Census of 2022.

This Compendium will be useful in studying the migration situation and for policymaking by relevant government authorities for the purposes of good migration governance and making full use of positive development potential of migration..

#### II. BRIEF METHODOLOGICAL EXPLANATIONS

The statistical Compendium is based on the results of the Population and Housing Census conducted in March 2022.

The population census was conducted by means of canvassing. Respondents were not required to present identification documents. The population was enumerated at the place of permanent residence, provided that the duration of absence did not exceed twelve months. Continuity of residence was determined without taking into account the status of *propiska* (residency registration) or its type (permanent or temporary).

Individuals who were away for work travel, work or studies for a period of up to one year were recorded based on statements of relatives.

The Compendium contains data characterizing the flows of **persons temporarily absent from residence**, with breakdown by countries of destination, as well as data on internal migration flows. The data are disaggregated by gender, age, ethnic composition, and level of education and are provided both for the national level, and the subnational level (*Provinces*, urban and rural areas)

For the first time the compendium features data on reasons for, duration of and destination of temporary absence of population, i.e. data on the flows, for various reasons, of individuals from the Kyrgyz Republic for a duration of up to one year.

Persons temporarily absent from Permanent (Usual) Residence refers to individuals who were, at the time of the population census, outside of the territory of the settlement of their permanent residence: persons who left for temporary or seasonal work, persons who are temporarily travelling for work, leisure, internship, family or friend visitation within or outside the Kyrgyz Republic, provided that the duration of such absence does not exceed 1 year. Exceptions to the definition above are the citizens of the Kyrgyz Republic who were away on long-term (one year or more) work trips to work in diplomatic, trade and other missions of the Kyrgyz Republic overseas, as well as members of their households residing with them.

**Internal migration** is defined as movement, for various reasons, of citizens of the Kyrgyz Republic within the Kyrgyz Republic for the purposes of permanently changing one's place of residence. In terms of the territorial boundaries involved, migration is divided into interregional (inter-*Oblast*) and inter-district/inter-*Raion* (intra-*Oblast*). It should be noted that inter-district migration is defined as either migration from one city district (*Raion*) to another district (*Raion*) within the same city or migration from one *Raion* of an *Oblast* to another *Raion* of the same *Oblast*.

**Emigration** is defined as the departure of citizens of the Kyrgyz Republic from the Kyrgyz Republic to the territory of another country for the purpose of permanent residence for a period of more than 1 year.

According to the UN methodology, information on respondents who have been absent in the country for a long time (1 year or more) should not be collected during the population census. However, given that Kyrgyzstan's situation is particular, involving high prevalence of migration, it was decided to collect information about such persons during the population census. Please note that such information is based only on the information provided about such persons by members of their households.

The data given below **on the level of education** describes the persons temporarily absent by the level of their general and specialized educational attainment, disaggregated by gender and age groups and place of residence.

The tiers of population's educational attainment are classified as follows:

primary general (primary) - persons who have graduated from 4th grade of secondary school; basic general (incomplete secondary) - persons who have completed 9th grade of secondary school;

**complete general (secondary) education** - persons who have graduated from a general secondary education organisation (school, including schools with advanced study of particular subjects), gymnasium, lyceum and obtained a certificate (*attestat*) of general secondary education.

**primary professional (vocational) -** graduates of primary professional education organisations and students of vocational (technical) schools and lyceums who have obtained a certificate (*attestat*) of general secondary education;

**secondary vocational (secondary professional) -** graduates of secondary vocational education institutions: technical school, vocational school (medical, musical, etc.), etc., and received a diploma;

incomplete higher professional education (incomplete higher education) - those who are attending or have completed training under the main educational curriculum of higher professional education, provided that the length of classes attended is one half or more of the established duration of studies;

**higher professional education** - graduates of higher professional education organisations (university, institute, academy, etc.) who have received a diploma:

**bachelor's degree** - graduates of basic higher education programmes (four years of study) in a particular field of study (graduates have in-depth general theoretical training in the field of study and specialisation);

**specialist degree** – those who have completed the full higher education programme in a particular speciality;

*master's degree* – those who have completed the full higher education programme in a particular field of study with in-depth general theoretical training in the field of study and specialisation, including compulsory research work and defence of a Master's thesis.

According to the recommendations of the Conference of European Statisticians on Population and Housing Censuses of the 2020 World Round, in the 2022 Population and Housing Census of the Kyrgyz Republic, the question on reading and writing ability was asked of persons aged 10 years and older, regardless of their level of education. While in previous censuses, this question was answered by persons aged 10 years and older with only primary education and/or no primary education.

An **illiterate** person is one who can neither read with understanding nor write an account of the events of his or her daily life.

The Compendium also contains data on the **ethnic composition of the** population. The Kyrgyz Republic has long been a multi-ethnic state, with more than 100 ethnic groups living in the country according to the 2022 Population and Housing Census.

**Ethnicity** in population censuses was recorded from the words of the interviewees, and the ethnicity of children was determined by their parents. The data on the composition of urban and rural population by the most numerous ethnic groups are given in terms of both, the country and the regions.

## III. GENERAL OVERVIEW OF POPULATION MIGRATION IN THE KYRGYZ REPUBLIC

In March 2022, the National Statistical Committee (NSC) conducted the census of the population of the Kyrgyz Republic.

The population census was conducted in two stages:

Stage 1. Simultaneously across the country, from 23 March to 3 April 2022;

Stage 2. In remote areas of the country - from 25 April to 2 May 2022;

Total 28,000 data enumerators were collecting data in the census.

The main difference between the 2022 census and previous censuses is the addition of a standard block of questions on labour activity and migration, as part of the census programme of the CIS and EAEU member states.

Two categories of population are used in demographics statistics:

available and resident population, with resident population being the population permanently residing in the given territory, including those who are temporarily absent at the time of the census.

The resident population of the Kyrgyz Republic as of 25 March 2022 was 6,936,156, including 2,408,183 people of urban population and 4,527,973 people of rural population.

Within the thirteen years that have passed since the 2009 census, the size of the resident population of the Kyrgyz Republic has increased by 1,573,400 people, or 29.3 per cent, including urban - by 581,000 people, or 31.8 percent, and rural - by 992,300 people, or 28.1 percent. In 2022, the excess of women over men, which is a persistent demographic trait of the Kyrgyz Republic, remained at 78.1 thousand people.

At the same time, according to the integrated survey of household budgets and labour force conducted by the National Statistical Committee of the Kyrgyz Republic, labour force (economically active population) in 2022 was 2 million 712.7 thousand people (40% women and 60% men).

At the time of the census, the resident population of the Kyrgyz Republic was 6 million 936.2 thousand people, of which 3 million 936.0 thousand (57 per cent) were of working age.

**Working age** is the age at which a person is capable of labour activity. In the Kyrgyz Republic, the working age is defined as 16-62 years for men and 16-57 years for women.

Of the total population, 1 million 94.5 thousand people were temporarily absent (labour migrants) from their place of permanent residence, accounting for about 16 per cent of the total resident population and 28 per cent of the working age population.

Table 1: Permanent population, working age population and population temporarily absent, by territory

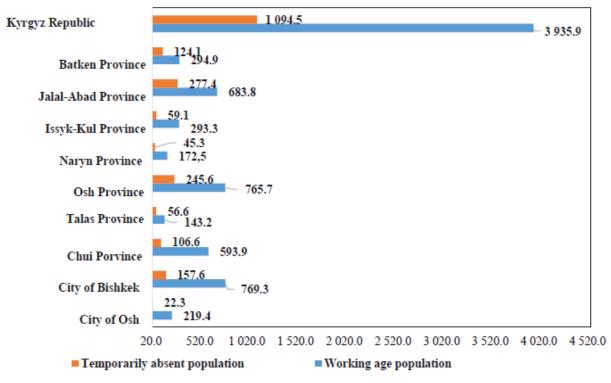

(people)

	Total,	of them of	out of the total	Perc	entage
	person	working age	headcount- temporarily absent	to the total population numbers	to the population in working age
Kyrgyz Republic	6 936 156	3 935 969	1 094 514	15.8	27.8
Batken Province	561 443	294 875	124 071	22.1	42.1
Jalal-Abad Province	1 292 420	683 788	277 359	21.5	40.6
Issyk-Kul Province	534 472	293 294	59 082	11.1	20.1
Naryn Province	306 573	172 534	45 311	14.8	26.3
Osh Province	1 439 633	765 710	245 620	17.1	32.1
Talas Province	271 950	143 180	56 589	20.9	39.5
Chui Province	1 056 758	593 901	106 636	10.1	18.1
Bishkek City	1 120 827	769 309	157 569	14.1	20.5
Osh City	353 080	219 378	22 277	6.3	10.2

The highest number of temporarily absent persons was recorded in Batken, Jalal-Abad and Talas Provinces (more than 20 per cent of the total number and 40 per cent or more of the working age population).

Figure 1: Distribution of temporarily absent population and working age population by territory

(thousand people)

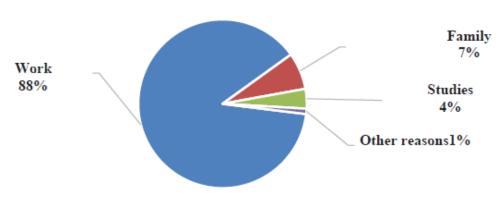

#### Persons Temporarily Absent, by Reasons of Absence

At the time of the census there were 1 million 94.5 thousand people who were temporarily absent from their place of permanent residence and of this number 964.6 thousand people or 88.1 per cent were absent due to work, 77.4 thousand people or 7.1 per cent were absent due to family reasons, 41.4 thousand people or 3.8 per cent were absent due to study and 11.1 thousand people or 1.0 per cent were absent due to other reasons (Figure 2).

Figure 2: Distribution of temporarily absent population by reasons for temporary absence

(percentage of total)

Of the total number of temporarily absent people, 876,900 or 80 per cent migrated abroad, while 217,600 or 20 per cent migrated within the country.

The bulk of those who were outside the country - 872.9 thousand people or 99.5 per cent went to CIS countries, and 4 thousand people or 0.5 per cent - to non-CIS countries.

The most preferred countries of stay for the temporarily absent population are Russia (870.3 thousand people), Kazakhstan (2.2 thousand people), Turkey (1.8 thousand people)

	population	Work	studies	family issues	other
in non-CIS countries	3 949	2 390	770	644	145
including:					
Germany	336	166	135	24	11
Korea (South Korea)	240	184	32	20	4
United States of America	255	129	56	59	11
Turkey	1 828	1 169	242	358	59
other non-CIS countries	1 290	742	305	183	60
within the Kyrgyz Republic	217 631	107 025	38 817	62 551	9 238

Of the population that was temporarily absent due to work, 98.1 per cent of men and 97.8 per cent of women migrated due to work to CIS countries.

Of the nearly 20 per cent of men and women who migrated within the country, 57 per cent of men and 40 per cent of women were absent due to work.

Table 3: Distribution of the temporarily absent population by gender, reasons for absence and place of stay

(thousands of people)

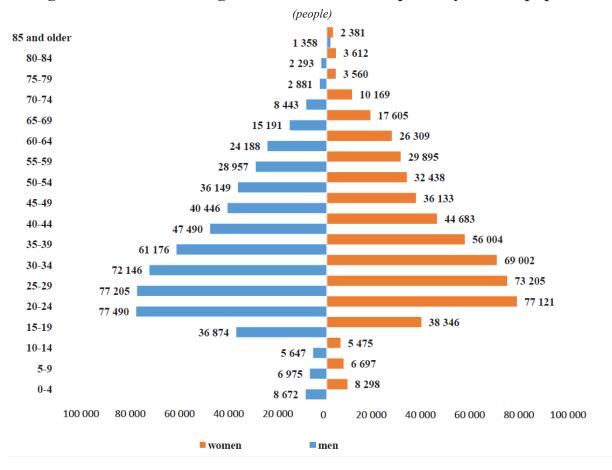

Place of absence	Men of whic	of which are absent due to			Women	of whi	of which are absent due to			
		work	studies	family issues	other		work	studies	family issues	other
Total	553.6	495.7	18.8	33.0	6.0	540.9	468.9	22.5	44.3	5.1
in the CIS countries	435.9	427.6	1.0	6. 4	0.9	436.9	427.6	0.7	7.7	0.8
on the territory of countries outside CIS	1.8	1.1	0.4	0.2	0.1	2.2	1.4	0.3	0.4	0.1
within Kyrgyzstan	115.8	67 .1	17.4	26.4	5.0	101.8	39.9	21.4	36.2	4.2

In the gender and age structure of the temporarily absent population, there are no significant differences in the proportion of men and women, and only at the age of 55 and older the number of women is noticeably predominant.

There were 492,500 men and 443,500 women of working age among the temporarily absent population.

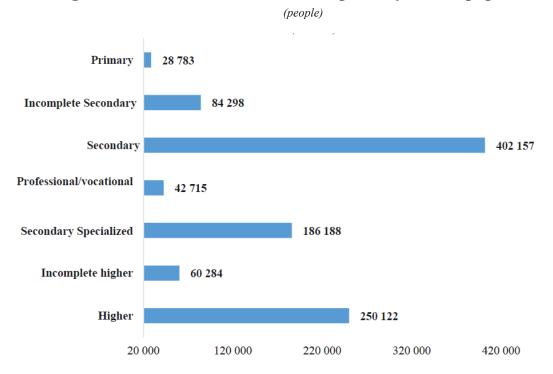

The largest age group among the men and women who migrated due to work is the 20-40 years age group.

Figure 3: Gender and age structure of the temporarily absent population

By education level, the temporarily absent population aged 10 years and older is classified as follows: 37.8 per cent have secondary education, 23.5 per cent have higher education, 17.5 per cent – have secondary specialised education (Chart 4).

Figure 4: Education level of the temporarily absent population

#### Ethnic composition of the temporarily absent population

In the ethnic composition of the temporarily absent population, the main share is Kyrgyz - 78.8 per cent, Uzbeks - 15.6 per cent and Russians - 2.6 per cent (Figure 5).

Russians 2.6 % Other ethnicities 2.1 %

Uzbeks 15.6 % Kyrgyz 78.8 %

Figure 5: Distribution of the temporarily absent population by ethnic composition

Across all ethnic groups, the largest share (more than 40 per cent or more than 50 per cent) is the working-age population between 20 and 40 years of age, and 20 per cent or more is the population between 40 and 60 years of age.

Of the total number of Kyrgyz (5,379,000 people) living in Kyrgyzstan, 16 per cent were temporarily absent, 17 per cent were Uzbeks (986,900 people), about 10 per cent were Russians (282,800 people), 16 per cent were Tajiks (59,900 people), 13 per cent were Kazakhs (28,200 people) and about 12 per cent were Uighurs (31,600 people).

Of the other small ethnic groups (58.1 thousand people), 14 per cent were temporarily absent from the total population.

The analysis of geographical distribution of the temporarily absent population reveals, as can be seen from the data in the table below, that migration has affected all areas of the country.

The main sources of outflows of the temporarily absent population are the Osh Province, Jalal-Abad Province and Batken Province, which are considered to be predominantly agricultural regions of the country. These regions have high rates of population growth. At the same time, the main share of growth is in rural areas.

Due to the underdevelopment of production and social infrastructure and the lack of spheres of application of surplus labour resources outside agricultural sector, the labour market in these regions is characterised by a surplus of labour force.

#### Internal migration of population

The number of people who, while residing in the country, changed their place of residence was 625,918, of which 28.3 per cent migrated to the Chui Province, 21.2 per cent to Bishkek City, 10.4 per cent to Jalal-Abad and Issyk-Kul Provinces, 6.5 per cent to Naryn Province, more than 7 per cent to Osh Province and Osh City, and 4 per cent to the Talas Province.

The bulk of the population of Issyk-Kul, Jalal-Abad, Osh, Talas and Chui Provinces (45 per cent or more) migrated only within their respective Province, with the exception of the population of the Batken Province, who migrated not only within their Province (29 per cent), but also to Chui Province and Bishkek City (21 per cent each); 33 per cent of the population from Naryn Province migrated to Chui Province, 27 per cent to Bishkek City, 62 per cent of the population from Bishkek City migrated to Chui Province, while 25 percent of the people moving from the Osh City moved to Osh and Chui Provinces each and 22 percent moved to Bishkek City.

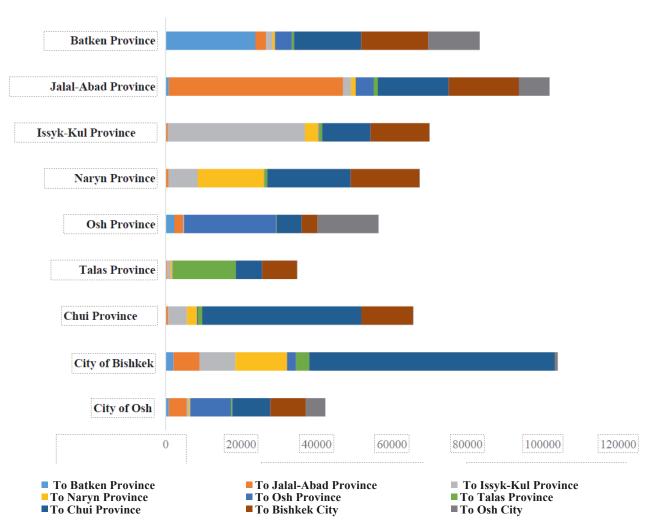

Figure 6: Internal migration of population by place of departure

#### **Long-term absent population (one year or more)**

For the first time during the 2022 census, information was collected on the number of former household members who left the country more than a year ago. This category of persons, according to UN recommendations, is not included into the population of the country. According to the 2022 census data, 199,409 persons left the Kyrgyz Republic and were absent, according to household members, for one year or more at the time of the census. Of these, 79 per cent were Kyrgyz, 15 per cent were Uzbeks, 2.6 per cent were Russians, and the remaining 3.4 per cent were of other ethnicities. Of the total long-term absent population, 87 per cent were of working age.

Men accounted for 61 per cent of long-term absent population, women accounted for about 39 per cent. Of those who migrated to CIS countries - 174,5 thousand people migrated to Russia; the total of those who migrated to non-CIS countries amounted to 17,400 people. Of this number those who migrated to Turkey amounted to 42 per cent, to Germany - 23 per cent, South Korea - 10 per cent, the rest migrated to Italy and the USA. In terms of total number of long-term absent population the leaders are the Jalal-Abad Province - 64.9 thousand people and Osh Province - 41.6 thousand people.

In addition, the 2022 Population and Housing Census provides data on the number of persons who previously lived in other countries and returned to Kyrgyzstan. (This question was asked for the first time in the history of population censuses: "Have you lived continuously for 1 year or more in another country?"). Out of 148 thousand people who answered positively to this question, 52.2 thousand (35.2 per cent) named family circumstances as the main reason for return, 45.5 thousand (30.7 per cent) named return to previous place of residence, 17.2 thousand (11.6 per cent) found a job in Kyrgyzstan.

It should be noted that the majority of returnees (about 83 per cent) are of working age. The share of men was 66 per cent and the share of women was 34 per cent.

9 - other reason
12. EDUCATION AND TRAINING
For persons aged 10 and older
12.1 CAN YOU READ AND WRITE?
1 - yes
2 - no
12.2 YOUR LEVEL OF EDUCATION
Select only one option corresponding to the highest level of education attained
higher professional (higher): 1 - Bachelor's 2 - Specialist's 3 - Master's
4 - incomplete higher professional (incomplete higher)
```

5 - secondary vocational (secondary professional)

- 6 primary professional (vocational)
  7 complete general (secondary)
  8 basic general (incomplete secondary)
- 9 primary general (secondary)
- 10 have no primary general (secondary) education

For persons with postgraduate education

#### 12.3 DO YOU HAVE A DEGREE?

1 - Candidate of Sciences 2 - Doctor of Sciences 3 - no degree

For persons aged 6 and older

#### 12.4. ARE YOU CURRENTLY ENROLLED IN AN EDUCATION PROGRAMME?

**1** - yes

**2** - no, move to question 12.5

If yes, please indicate the type of educational organisation:

1-postgraduate professional (aspirantura or doktorantura)

**2**-higher professional

3- secondary vocational

4-primary vocational

5- general (secondary), of all types

6- other school

For children aged 1-7 years not attending school

#### 12.5. DOES THE CHILD ATTEND A PRE-SCHOOL EDUCATIONAL ORGANISATION?

**1** - yes

2 - no, move to question 12.6

#### 12.6. DOES THE CHILD ATTEND ANY OTHER EARLY LEARNING PROGRAMMES?

**1** - yes

**2** - no

For persons aged 5 and older

### 13. FUNCTIONAL DISABILITIES 13.1 DO YOU HAVE DIFFICULTY SEEING EVEN WITH GLASSES?

1- no difficulty at all

2- yes, some difficulty

3- yes, significant difficulty

4- I don't see at all

#### 13.2 DO YOU HAVE DIFFICULTY HEARING EVEN IF YOU USE A HEARING AID?

1- no difficulty at all

2- yes, some difficulty

3- yes, significant difficulty

4- I don't hear at all

#### 13.3 DO YOU HAVE DIFFICULTY WALKING OR CLIMBING STAIRS?

1- no difficulty at all

2- yes, some difficulty

3- yes, significant difficulty

4- I can't walk at all

#### 13.4 DO YOU HAVE DIFFICULTY REMEMBERING OR CONCENTRATING?

1- no difficulty at all

2- yes, some difficulty

3- yes, significant difficulty

4- I can't remember anything and can't concentrate
